SMART Board® 6065 interactive flat panel

Model SPNL-6065

Overview

The SMART Board® 6065 interactive flat panel features SMART's proprietary DVIT® (Digital Vision Touch) technology and combines a premium touch experience with the power of SMART Notebook® collaborative learning software on a 64 1/2" (163.9 cm) LED display.

The 4K ultra-high-definition resolution display provides optimal image clarity and viewing from any angle. With the new Pen iQ feature, you can assign different ink appearances to either pen and write or draw over any application in digital ink.

With Object Awareness, you can perform mouse functions with your finger, write in digital ink with the pen, and erase with your palm or eraser—all without switching tools or modes. You can also use an array of gestures in applications. Two users can write or draw at the same time.
